1 Introduction

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Ut purus elit, vestibulum ut, placerat ac, adipiscing vitae, felis. Curabitur dictum gravida mauris. Nam arcu libero, nonummy eget, consectetur id, vulputate a, magna. Donec vehicula augue eu neque. Pellentesque habitant morbi tristique senectus et netus et malesuada fames ac turpis egestas. Mauris ut leo. Cras viverra metus rhoncus sem. Nulla et lectus vestibulum urna fringilla ultrices. Phasellus eu tellus sit amet tortor gravida placerat. Integer sapien est, iaculis in, pretium quis, viverra ac, nunc. Praesent eget sem vel leo ultrices bibendum. Aenean faucibus. Morbi dolor nulla, malesuada eu, pulvinar at, mollis ac, nulla. Curabitur auctor semper nulla. Donec varius orci eget risus. Duis nibh mi, congue eu, accumsan eleifend, sagittis quis, diam. Duis eget orci sit amet orci dignissim rutrum.

Here is another paragraph of text. I am curious as to whether this will be indented or not.

2 Figures and Tables

The tables and images that appear in the document must always be referenced. They should be referenced using links, for example: "As seen in Figure 1 and Table 1, the results are presented..."

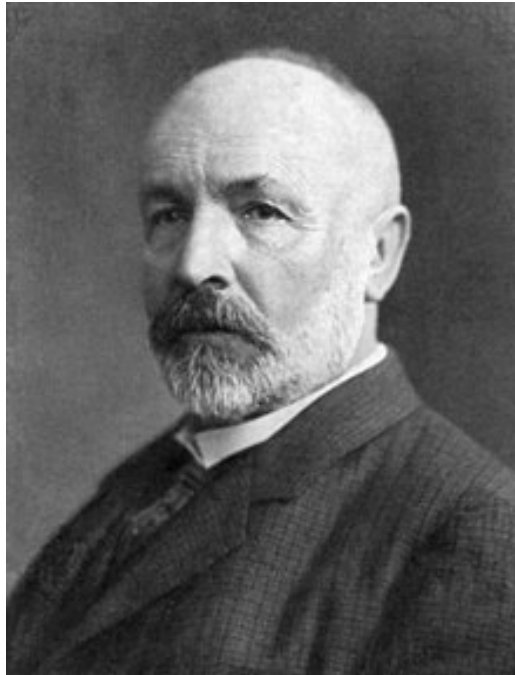

Figure 1: Picture of some guy

For the composition of tables, the font size should always be smaller than that of the rest of the text, and it is recommended to opt for the following format:

Formula	Test 1	Test 2
Compound 1	38.4	6.32
Compound 2	16.6	12.5

Table 1: Results from different substances.

Tables, like figures, must always have a caption. This approach uses the `booktabs` package, which improves their presentation. You can also include code, such as the one shown in Code 1.

```
# Bubble sort
def BubbleSort(a):
    for i in range(len(a)-2):
        for j in range(len(a)-i-1):
            if a[j] > a[j+1]:
                a[j],a[j+1] = a[j+1],a[j]
    print("The list has been sorted.")
    return a
```

Code block 1: Example of code

3 Conclusions

- Lorem ipsum dolor sit amet, consectetur adipiscing elit. Ut purus elit, vestibulum ut, placerat ac, adipiscing vitae, felis. Curabitur dictum gravida mauris. Nam arcu libero, nonummy eget, consectetur id, vulputate a, magna. Donec vehicula augue eu neque. Pellentesque habitant morbi tristique senectus et netus et malesuada fames ac turpis egestas. Mauris ut leo. Cras viverra metus rhoncus sem. Nulla et lectus vestibulum urna fringilla ultrices. Phasellus eu tellus sit amet tortor gravida placerat. Integer sapien est, iaculis in, pretium quis, viverra ac, nunc. Praesent eget sem vel leo ultrices bibendum. Aenean faucibus. Morbi dolor nulla, malesuada eu, pulvinar at, mollis ac, nulla. Curabitur auctor semper nulla. Donec varius orci eget risus. Duis nibh mi, congue eu, accumsan eleifend, sagittis quis, diam. Duis eget orci sit amet orci dignissim rutrum.
- Nam dui ligula, fringilla a, euismod sodales, sollicitudin vel, wisi. Morbi auctor lorem non justo. Nam lacus libero, pretium at, lobortis vitae, ultricies et, tellus. Donec aliquet, tortor sed accumsan bibendum, erat ligula aliquet magna, vitae ornare odio metus a mi. Morbi ac orci et nisl hendrerit mollis. Suspendisse ut massa. Cras nec ante. Pellentesque a nulla. Cum sociis natoque penatibus et magnis dis parturient montes, nascetur ridiculus mus. Aliquam tincidunt urna. Nulla ullamcorper vestibulum turpis. Pellentesque cursus luctus mauris

4 Bibliography & citations

The bibliography must be included using a .bib file. The bibliography style to use is APA 7th edition. For citations, you can use the following commands as appropriate:

- Full citation in parentheses `\parencite{ }`: (Stewart et al., 2012)
- Full citation with year in parentheses `\textcite{ }`: Stewart et al. (2012)
- Full citation without parenthese `\cite{ }`: Stewart et al., 2012
- Cite author `\citeauthor{ }`: Stewart et al.
- Cite year `\citeyear{ }`: 2012
- Cite with extra options `\parencite[ ] [ ]{ }`: (ver Stewart et al., 2012, p. 66)

Note: Citation handle (in this case `stewartpre`) is defined in .bib file.

4.1 Citation examples

Apparently, only the first paragraph in a subsection is un-indented; all the rest are. Según Stewart et al. (2012), “la forma más importante de visualizar una función es por medio de su gráfica” (p. 152). Además, sabemos que “la gráfica de una función f da un retrato del comportamiento” (Stewart et al., 2012, p. 153). Por otro lado, una función se dice lineal porque su gráfica representa una recta (Stewart et al., 2012). Finalmente, según Stewart et al. (2012):

We usually consider functions for which sets A and B are sets of real numbers. The symbol $f(x)$ is read as “ f of x ” or “ f at x ” and is called the value of f at x , or the image of x under f . Set A is called the domain of the function. The range of f is the set of all possible values of $f(x)$ as x varies over the entire domain. (p. 125)

This paragraph will be indented because it is not the first paragraph of a subsection.

We usually consider functions for which the sets A and B are sets of real numbers. The symbol $f(x)$ is read “ f of x ” or “ f at x ” and is called the value of f at x , or the image of x under f . The set A is called the domain of the function. The range of f is the set of all possible values of $f(x)$ as x varies throughout the domain. (Stewart et al., 2012, p. 125)
